

## IR Laser Diode

### Application

Industrial use / Biomedical / Medical application

### Property

Wavelength  $\lambda = 808\text{nm}$

Output Power = 1000mW

Package Type =  $\varphi 9\text{mm}$

### Introduction

Egismos currently markets AlGaAs infrared laser diodes in the 780nm ~ 1550nm wavelengths range. The low operating current and high temperature of the laser diodes are achieved through using misoriented substrate and MQW (Strain compensated) active layer.

Egismos laser diodes are highly rated in a broad range of applications including, but not limited to, laser pointers, green lasers, blue laser DVD, laser barcode scanners, diode laser equipments, medical instruments and aerospace applications.
