#### 650nm Laser Diode

# **EGISMOS**

## Red Laser Diode

ApplicationIndustrial use / BiomedicalPropertyWavelength  $\lambda = 650$ nm

Output Power = 30mW Package Type =  $\varphi$  5.6mm

### Introduction

Egismos currently markets AlGaInP based red laser diodes in the 635nm ~ 670nm wavelengths range. The low operating current and high temperature of the laser diodes are achieved through using misoriented substrate and MQW (Strain compensated) active layer. Egismos laser diodes are highly rated in a broad range of applications including, but not limited to, laser pointers, green lasers, blue laser DVD, laser barcode scanners, diode laser equipments, medical instruments and aerospace applications.
