**Notes:**

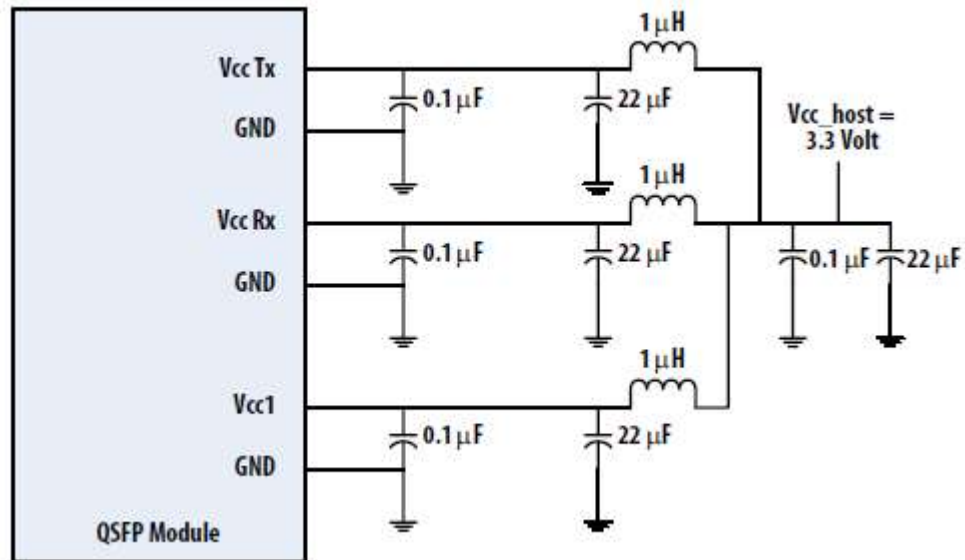

1. TDP value and dependent parameters are subject to confirmation.
2. Transmitter eye mask is defined by CWDM4 Specification 1.1.
3. Average receive power, each lane (min) is informative and not the principal indicator of signal strength. A received power below this value cannot be compliant; however, a value above this does not ensure compliance.
4. Measured with conformance test signal at TP3 for BER =  $5 \times 10^{-5}$
